

NEW INTERNATIONAL ACOUSTIC TESTING DEMONSTRATIONS

RSVP NOW
July 26th - August 13th

AGENDA

Meet & Greet
Introduction
The ARS System Concept
m+p international Acoustic Control
Operational Demonstration
Question & Answer Session

LOCATION

ARS's Demonstration Facility
Eastern WV Regional Airport
170 Aviation Way
Martinsburg, WV 25405

(Additional location details and COVID-19 safety protocols to follow)

CONTACT

We look forward to welcoming you to our demonstration, and should you have any queries or concerns, please do not hesitate to contact:

m+p international & Acoustic Research Systems invite you to RSVP Now and join us to experience the new reference for ultra-high output acoustic testing.

The Acoustic Research Systems NEUTRON System, featuring m+p DF-ACS acoustic control is designed from the ground up specifically for performing acoustic tests in direct field or reverberant field environments. Scalable and Quick to set up, NEUTRON's fully-incoherent sound field eliminates standing waves for greater precision and helps protect the test specimen from potentially damaging acoustic artifacts. This proprietary system gives users more control and flexibility to conduct acoustic tests with greater accuracy, increased efficiency, and in less time than ever before.

In-person demonstrations of our direct field acoustic testing capabilities will be hosted at the Acoustic Research Systems facility outside Washington, DC this summer, followed by demonstrations this Fall in Europe. If the current US demonstration dates do not suit your agenda, please let us know and we will be happy to offer you a virtual demonstration or schedule you for our European demonstrations in October.

Please contact us at your earliest convenience if you are interested in attending the demonstrations of our next generation, turn-key acoustic testing solution.
